

Redwood Business Solutions for Report2Web

Making web-based report distribution a reality.

Why Migrate to Report2Web Version 4?

Report2Web v4 has been designed to implement valuable innovations and evolve with our customers. It's even easier, faster and more flexible than earlier versions. There are many significant and measurable benefits to upgrading. However, we understand that planning for such a migration requires your organization's time and resources. To help you evaluate, plan for and champion this migration in your organization, we've compiled information about some of the many benefits a V4 upgrade will bring.

Infrastructure Benefits

- New ability to compress stored reports when encryption is enabled
- New scalable, Java-based server architecture
- New support for Windows Server® 2008 operating system (32-bit or 64-bit), Red Hat® Enterprise Linux® 5.2 (32-bit) and SUSE Linux Enterprise Server 11 (32-bit)
- Support for SQL Server® 2008 (32-bit or 64-bit) and Oracle® (v10g or 11g) database
- Enhancements to Excel® functionality including the ability to create .xlsx files

Administration Benefits

- Enhanced web-based security administration for a more distributed administrative responsibility
- Centrally stored content access to folders so that administrators to make changes from a single interface
- New built-in scheduler for Report2Web internal tasks eliminates the need for Catalog Builder
- Ability to schedule system reports directly from the application
- Enhanced markup and PDF creation features for the Burster

Security Benefits

- Improved folder and file security for report information stored in its rested state
- New optional Advanced Encryption Standard (AES) encryption of report information stored in its rested state

End-User Benefits

- Modernized, intuitive user interface
- Improved folder navigation
- Standardized right-click menu options
- User-defined and public saved searches for quick retrieval
- New page-level keyword search/navigation

Redwood Business Solutions

Making web-based report distribution a reality.

These are just a few of the many benefits you can expect from Report2Web version 4. If you have questions or are ready to begin your migration planning, contact your account manager or email info@redwood.com.

Here's what some of our customers have to say about Version 4:

“ Our conversion from Report2Web version 3 to version 4 was virtually flawless due to the dedicated and detail-oriented staff at Redwood. I thank Redwood for their support and diligence during this time. ”

**Marilyn Spicer, Report2Web Administrator,
LifeWay Christian Resources**

“ The version control feature in version 4 is so user-friendly. Our stores are now able to quickly locate previous versions of reports by clicking the icon to the left of the report name. No more paging through lists to find what they are looking for. ”

**Gwen Brown, Information Systems Specialist,
Harps Food Stores, Inc**

HARPS

“ We are proud of what we've done with Report2Web version 4. We never had a way to deliver reports instantly to the stores, this is a key benefit we receive from the solution—to be able to deliver a manifest within 5 minutes of publishing is pure magic. ”

**Ken Scanlon, Director of Data Management and Reporting,
Casual Male Retail Group, Inc.**
